

Step 1. Cleanse & moisturize as usual - Allow all treatments to dry to touch before proceeding

Step 2. With the jar lid on, gently shake the mineral powder foundation jar to dispense the foundation into the sifter.

Step 3. Remove lid and dip the Mineral Foundation Brush into the powder, tapping against the rim of jar to remove excess. It is not necessary to use all powder in sifter - a little goes a long way.

Step 4. Swirl the Mineral Foundation Brush inside the LID so that the powder is worked into the bristles.

Step 5. To apply, start in the center of the face and work out to either side toward the hairline and along jawline, blending well. For a light, natural coverage, a single, thin layer should be enough. For increased coverage, repeat the application process, applying the Mineral Powder Foundation in thin layers until desired coverage level is achieved.
