Many consultants find that they sell what they use, which make perfect sense. You know how to use the product, order of application and the benefits of each. Giving you confidence, knowledge, and excitement when selling!

You deserve success right away, and it starts with YOU!

Step 1 = Toss out all other brands in your cosmetic and skin care wardrobe! Could you imagine someone asking you what shade your eye color is and having to tell them it's brand "X". So be true to your business - and go all the way.

Step 2 = Look at the product list on the left, check off any you are currently using. Then grab a copy of the current Look Book and go shopping for any unchecked items. Use the form below for your color selections and items not listed.
