

The Clear Proof™ Acne System

How It Works

The Clear Proof™ Acne System uses a combination of salicylic acid and benzoyl peroxide to attack the multiple factors that can contribute to acne breakouts.

Salicylic acid acts like an exfoliant to promote the easy removal of dead skin cells. As such, it helps keep pores unclogged and reduce the build-up of *P. acnes* bacteria.

Benzoyl peroxide (BPO), on the other hand, is an oxygen-releasing ingredient that kills bacteria. *P. acnes* bacteria flourish when there's a lack of oxygen, like in a clogged pore. By creating an oxygen-rich environment, BPO can help reduce the number of *P. acnes* bacteria that can cause lesions to form. It also can help in dissolving the buildup of dead skin cells.

Clear Proof™ Pore Purifying Serum

In an independent clinical study**, people showed significant improvement in their acne when using the Pore-Purifying Serum for Acne-Prone Skin‡ with the Clear Proof™ Acne System.

Clear Proof™ Acne System 12-week clinical study*

76% of panelists showed improvement in overall number of blemishes

Clear Proof™ Acne System Plus Pore-Purifying Serum for Acne-Prone Skin‡ 12-week clinical study**

85% of panelists showed improvement in overall number of blemishes
